**S6302U** Ethernet digital input module has total 16 channels isolated wet contact or dry contact or open-collector input, Each input channel also can work as 32-bit counter input, the maximum frequency is 1000Hz for total 16 channels and 5000Hz for only one channel.S6302 can connect to PC through USB port, USB1 port support modbus protocol, and connect to local Ethernet with modbus/tcpip protocol. All these communication port has static, over current, over voltage protect.

#### Highlights:

- Industry Ethernet with MODBUS/TCPIP
- RS232 / RS485 with MODBUS protocol to configure the module
- Isolated digital inputs can be configured as counter input, total 32 bits,5000Hz
- Can measure frequency from 0 to 1000Hz,the resolution is 0.1Hz
- Accept reed and hall sensor output from water meter or other meters
- Static and lightning protection for each input
- The input channel number is configurable, can be set up from 1 channel through 16 channels, improve frequency for small count input

**Wiring Diagram and Description:**

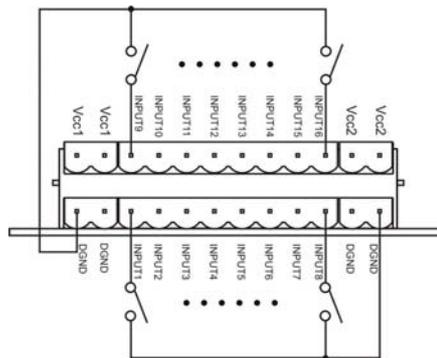

**Top View Figure**

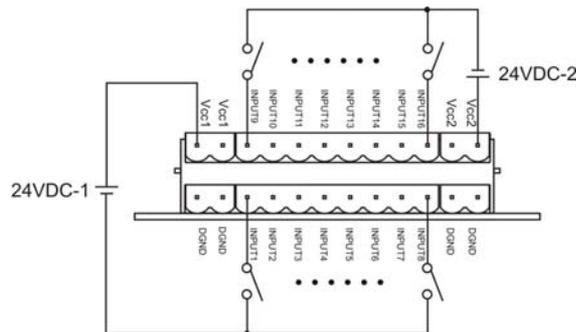

**Wiring Diagram \_ USB**

The serial port can use RS232 or RS485, we will provide different module to replace each other, the default is RS485 output.

**Dry contact input, relay contact**

**Wet contact input, 0-36VDC**

For wet contact input, low level input is 0-1V and high input can be 3-36VDC, there are two group common source and each group has 8 inputs.

**PINs and LEDs**

## Power supply

24VAC: power supply positive input, has reverse protection, accept AC and DC input

- : Power supply negative input

## USBPort

DATA+: connect to UD+ end of USB

DATA-: connect to UD- end of USB

RGND: GND of USB

We will provide a cable to connect to RS232 port. RS232 and RS485 use the same terminal, user can get RS232 or RS485 by changing a serial communication module.

## Ethernet port

Connect to local Ethernet network through RJ45 cable

## Inputs

Vcc1: Power source input for digital input 1 through 8

DI1 ~ DI8: Digital input channel 1 through 8

Vcc2: Power source input for digital input 9 through 16

DI9~DI16: Digital input channel 9 through 16

DGND: common for digital input 1 through 16, available in dry input mode

## LEDs

Heart: Will flash when system is working

Comm: Will flash when RS232 serial port communication

## Jumpers

ISP: keep ON in program mode
